2022
ANNUAL
REPORT

Rescuing Native Florida Wildlife
— Since 1980 —

EST. 1980

vision & mission

Pelican Harbor Seabird Station is Miami's premier native wildlife hospital evolving into a world-class wildlife rescue, rehab, release, and education center. We are dedicated to improving the lives of sick, injured, and orphaned native wildlife with the goal of releasing healthy animals back into the ecosystem, thus enabling future generations. We embody the highest level of patient care, compassion, and integrity while promoting community engagement on the importance of wildlife conservation.

Deeks Foundation

The Batchelor Foundation

Pelican Harbor Seabird Station would like to extend a special acknowledgment of gratitude to the Deeks Foundation and The Batchelor Foundation for their generous support of our capital campaign and their ongoing support of our annual operating fund.

Robert Glidewell, Chairman

A twenty-year resident of South Florida, Robert owns Glidewell Aviation Inc., and is president of Glidewell Consulting, which provides government relations services in the Washington, DC, area. He developed his love of the outdoors and wildlife while growing up in Arkansas in the Ozark and Ouachita mountain regions. Robert is a graduate of the University of Arkansas and Everglades University in Boca Raton with a Bachelors in Business Management and holds licenses for aircraft pilot as well as Florida contractors licenses.

Marcus McCarthy, Vice Chairman

Marcus is the principal owner of McCarthy Real Estate, a real estate development company, and a 20-year partner in a restaurant chain located in Houston. Marcus was born in Dallas, Texas, and graduated with a BBA from Stephen F. Austin State University, where he met his wife Jane McCarthy. Early in his career, Marcus worked for Sensomatic Electronics based in Deerfield Beach, FL, and was also involved in the United Way as a Big Brother for 15 years.

Darren Steinbook, Treasurer

Darren is an Internal Advisor for Wells Fargo Bank and co-chair of the SFL Wells Fargo Green Team, a grassroots volunteer chapter for Wells Fargo team members dedicated to making a positive impact on the environment. Growing up on Biscayne Bay, he was inspired by the South Florida wildlife and environment. His love for the unique ecosystem carried into his adult years, where he now advocates for the preservation and protection of the Bay and surrounding areas.

David Epstein

David Epstein is CEO of Seagen and a board member at Valo Health and Opy Acquisition Corp. From early 2010 to mid-2016, David served as chief executive officer of Novartis Pharmaceuticals. David is also a Director at the non-profit Three Opinions Foundation, a generous supporter of PHSS. David holds a B.S. in pharmacy from Rutgers University College of Pharmacy and an M.B.A. in finance and marketing from the Columbia University Graduate School of Business.

Helene Valentine

Helene began her career at the University of Miami Rosenstiel School of Marine Sciences, studying the effects of pollution, pesticides, and toxins on marine life. The next 30 years were devoted to studying human neurodegenerative diseases at the UM School of Medicine, where she recently retired from her position as Director of Research Support. She graduated from Maryville College in Tennessee, where her studies in Ecology and Biology cemented her appreciation for the natural world.

Marilyn Magill

Marilyn was an Educator in the Boston Public School System for two years and a Delta Airlines Flight Attendant for 27 years. As a lifelong animal advocate, the Deep Horizon oil spill was the impetus for Marilyn to join Pelican Harbor Seabird Station. She saw it as an opportunity to learn about new species and make a difference in the lives of our local wildlife. Marilyn attended the University of Southern Mississippi, the University for Foreigners in Perugia, Italy, and Barry University, where she earned a BFA.

Jacqueline D. Greenberg, CPA

After graduating from Goucher College with a degree in Biology and Chemistry, Jackie continued her studies observing the mating behavior of Black Skimmers while living in Tampa at the University of South Florida. In 1976, she sought another path professionally by becoming a Certified Public Accountant. She currently works in public accounting and has also applied her trade as a senior financial officer in non-profit entities, in banking, and as a contract employee with the FDIC.

David Williams, Jr.

David Williams, Jr. is a Scientist by profession and spent 33 years in the Pharmaceutical Industry. He took an early retirement to pursue his passions for Early Learning, Family, and the Environment, and served as a Councilman for Miami Gardens for 12 years. David received his Bachelor of Science in Health from Florida A & M University and a Master of Science in Human Resources Development and Administration from Barry University, along with varied Preceptorships from numerous esteemed institutions.

Jacqueline (Jacki) Contney

Jacki has 26 years of experience in the field of Construction Management for large-scale projects in both the public and private sectors, including the Port of Miami, Miami Beach Convention Center, and the Airport Link Metrorail Extension. She earned both her BS in Architectural Technology and MS in Construction Management from Florida International University and has played a crucial role in the development of our capital campaign.

Adrian P. Chapman

Adrian P. Chapman is the retired President and Chief Executive Officer of WGL Holdings, Inc. and Washington Gas. Previously, he also served as President of U.S. Utilities for Washington Gas' parent company, AltaGas Ltd. Mr. Chapman is also a past Chair and member of both the Goodwill of Greater Washington Board and the Board of Directors of the Northern Virginia Chamber of Commerce. He received his BA in Economics from the College of William and Mary, and his MA in Economics from George Mason University.

David Wallack

David is the founder and owner of the world-famous Mango's Tropical Cafe - South Beach. He has spent his life in personal care, hospitality, and philanthropy, along with the development and renaissance of South Beach and now Orlando. David has also been awarded three Keys to the City of Miami Beach and a Mayoral Citation of Achievement for his work benefiting Miami Beach. David graduated University of Miami Law School, Summa Cum Laude, in 1977.

Dr. Gwen E. Myers

Dr. Myers began her career as an Associate Veterinarian at the Columbus Zoo before joining Zoo Miami in 2015 as the Chief of Animal Health, where she currently provides oversight to the veterinary department, quarantine, nutrition programs, and the new sea turtle rescue and science center. She is also an active member of the American Association of Zoo Veterinarians (AAZV), serving on the Infectious Disease Committee and the Strategic Planning Advisory Board. She graduated from the Virginia-Maryland College of Veterinary Medicine in 1999.

Jacey Birch

Jacey Birch anchors Local 10 News Mornings and is proud to be the animal advocate for Local 10's investigative team. An avid environmentalist, Jacey works to make a difference in preserving our planet and loves covering stories in South Florida regarding the ocean, reefs, beaches, parks, and alternative sources of energy. She graduated from the University of Florida, earning her Bachelor of Arts in Political Science and Bachelor of Science in Journalism.

40,000th Patient Treated

After 42 years in operation, PHSS treated our 40,000th patient, a juvenile Red-Shouldered Hawk. The hawk was found on the ground, unable to fly, and was very weak and dehydrated upon admission. Clinic staff administered supportive care for possible rodenticide poisoning, and after over three weeks, the hawk was successfully released at the future site of our state-of-the-art wildlife rehabilitation and education center! *To learn more about this ongoing project, visit pelicanharbor.org/capitalcampaign.*

A Royal Tern for the Record Books

A Royal Tern was admitted in late December after being found unmoving on a seawall. It was cold, had bumble lesions on both feet, and a significant wing droop. Upon examination, staff noticed that the bird had a small federal band on its leg. Scientists will band individuals of different avian species to help with studies of dispersal and migration, behavior and social structure, lifespan and survival rate, as well as population growth. After reporting the band number, we learned that this patient was banded on July 7, 1993, making him approximately 29 years and five months old. This is just one year younger than the oldest Royal Tern on record, who was approximately 30.5 years of age.

Two Endangered Wood Storks Released

For the first time in PHSS's history, a Wood Stork was successfully rehabilitated and released back into the wild. Wood Storks are indicator species, meaning that they are very sensitive to changes in their environment. Given the delicate nature of these birds, rehab is often quite difficult. However, after 38 days in care, Patient #22-241 made a full recovery and was released to the wild. Even better, a second Wood Stork, Patient #22-1398 was admitted in August, and was also successfully released after 32 days of treatment.

Harry Kelton May 3, 1926 - August 23, 2022

In August 2022, PHSS mourned the loss of our founder and friend, Harry Kelton. Harry and his wife of 48 years, Darlene, helped to revolutionize the rehabilitation and care of Brown Pelicans and were instrumental in helping bolster their population by releasing more than 7,000 during a time when they were still on the endangered species list. Harry and Darlene live on in the incredible work that continues at Pelican Harbor Seabird Station, and we are honored to continue fulfilling their legacy each and every day.

Harvey Ruvin June 1, 1937 - December 31, 2022

A committed supporter of environmental issues, Harvey served on the PHSS Board of Directors for 30 years, later becoming a Lifetime Honorary Director, and was the longest-serving elected official in Miami-Dade County. Harvey was also instrumental in securing a home for our current wildlife hospital in 1991, presiding over the ribbon-cutting ceremony with founders Harry and Darlene. A tireless and generous supporter of our mission, Harvey will be deeply missed.

Education & Community Outreach

Environmental education continues to be one of the most important tools in our arsenal against the anthropogenic threats that face our local ecosystem. With the return of many in-person school visits and community events, combined with the tools we gained during the pandemic, such as presentations via Facebook Live and Zoom, PHSS reached tens of thousands of adults and students in 2022. Inclusive programming is integral to keeping our communities knowledgeable and, therefore, capable of making educated and conscious decisions about interacting with our shared environment. We are dedicated to seeking opportunities for meaningful community interactions that surpass the one connection and create a ripple effect, leading to a more empathetic and environmentally conscious world.

Little River Clean Up

In 2022, we hosted our inaugural Little River Clean Up that launched from the shores of our future home at 399 NE 82nd Terrace. Over 150 community members came out to support PHSS and clean the historic Little River. Over the course of three hours, we were able to remove over 400 pounds of debris from the river! It was inspiring to see the community come together for the shared purpose of protecting our local environment.

Pelican Run 5k

The 1st Annual Pelican Run 5k held at Haulover Park was a huge success, with over 200 runners in attendance. We even had some young philanthropists who flew in from Germany for the event! Fun was had by all, and over \$17,000 was raised for our wildlife rehabilitation and education programs.

Pelican Run 5K
IT'S FOR THE BIRDS

The Challenge

Our current 950-sq.-ft. hospital was built in 1992 to care for a few hundred pelicans annually. Some thirty years later, we have expanded our mission to include nearly all native wildlife, and due to the ever-increasing threats to our wildlife population, we now treat 2,000+ patients a year of over 150 distinct species. But it's not enough. We no longer have room to support the significant increase in patient load. We have no education center to bring school groups on-site to ensure that future generations understand the importance of conservation in the community. We have no ICU for our patients in the most critical condition. We lack quarantine quarters, so we are unable to accept certain species in need. We have outgrown our beloved Seabird Station and need to build a new space that will facilitate strong strides in the preservation and protection of native species through educational and scientific means.

The Solution

After spending several years exploring solutions, the perfect property finally became available: the "Little River Preserve" at 399 NE 82nd Terrace. Previously owned by Miami history icon Julia Tuttle, this idyllic 2.6-acre property is truly an urban oasis. With open fields and old-growth tree canopies, this expansion will increase our property size by 14 times, providing plenty of room for flight cages and appropriately sized habitats for our patients and education ambassador animals. Our new wildlife hospital and nature center will be 8.5 times larger than our current facility, allowing us to provide state-of-the-art individualized care for every one of our patients. As a historic Tequesta Native American site, the property will also serve as a nature park and education center. The new facility will be environmentally friendly and will be undergoing Green Globes sustainability certification.

Our Progress

In late 2022, our property was successfully rezoned from residential to commercial use, and we plan to break ground in 2023, commencing with site development work.

Your Support

Naming opportunities for rooms, enclosures, and habitats are still available, as well as personalized single or double bricks. Help us to reach the finish line by making a one-time gift or supporting us via a multi-year pledge, stocks, annuities, or a planned estate gift. Scan the QR code to learn more and make a lasting impact today.

2022 Financials

Pelican Harbor Seabird Station is a 501(c)(3) non-profit. We pride ourselves on our integrity and strive to keep our fundraising and administrative costs to a minimum so that we can stretch our dollars and provide the best patient care possible.

Seabird Station

The Legacy Society

The legacy society recognizes those individuals and families who have remembered Pelican Harbor Seabird Station in their estate plans through a documented planned gift. More so, it serves to enable members and friends to witness the value of PHSS in their lives and secure Florida's native wildlife for generations to come. Membership is simple—no need to donate today! Simply name PHSS as a beneficiary in your will, trust, insurance policy, donor-advised fund, or foundation.
