

Pelican  
Harbor  
Seabird  
Station

---

2021  
ANNUAL  
REPORT

Pelican Harbor Seabird Station is Miami's premier native wildlife hospital evolving into a world-class wildlife rescue, rehab, release, and education center. We are dedicated to saving the lives of sick, injured, and orphaned native wildlife with the goal of releasing healthy patients back into the ecosystem, thus enabling future generations. We embody the highest level of patient care, compassion, and integrity while promoting community engagement on the importance of wildlife conservation.

Dear Friends of Pelican Harbor,

For more than 40 years, Pelican Harbor Seabird Station has served the Pelicans, other species of native wildlife, and communities of Greater Miami and Southern Florida. This past year, in addition to treating over 2,100 new patients, including several threatened species and patients not previously seen at PHSS, we made significant progress on articulating a new, more inclusive vision and strategy for our organization. PHSS is dedicated to the rescue, rehabilitation, and release of sick, injured, or orphaned Brown Pelicans, seabirds and other native wildlife. In our opinion, preserving and protecting these species, as well as educating new generations about them, is key to a responsible and robust human experience on our planet.

In 2021 we also made progress on our exciting journey to build a new and more expansive state-of-the-art facility on a beautiful 2.6-acre property on the bank of Miami's Little River. Plans have been drawn, teams put in place, and we now await zoning approvals with the goal of breaking ground within the next 12 months.

When our new site is complete and open, more patients will be treated and released each year; more students will be educated on the importance of wildlife conservation; our communities will know where to send injured wildlife when they see them on our beaches and in our backyards. Miami and Southern Florida will be better for it.

As you know, we are currently in an inflationary environment that will impact our building costs. Therefore, our refined plans reflect an increase in the target of our capital campaign to \$12,000,000. As of the start of this year, we have raised \$7,125,000 including matching gifts. I would like to thank all of you for your generosity and also remind that there are several naming opportunities still available. Please consider making Pelican Harbor a beneficiary of your generosity in 2022.

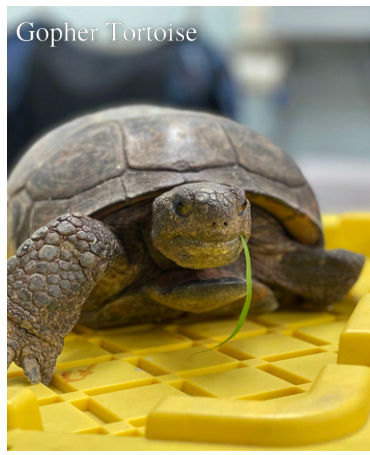

I invite you to join us in helping to restore South Florida's biodiversity and assist in healing the world in which we live, work, play, and grow.

Sincerely,

David Epstein  
Chairman of the Board

Connecticut Warbler

Osprey

## In 2021, we are proud to have:

- Treated 2,124 patients of 118 species
- Assisted 5,615 callers with wildlife emergencies
- Passed the halfway mark of our Capital Campaign goal
- Received a record total of donations on Give Miami Day
- Expanded our administrative and clinic staff
- Reached over 1,750,000 students and community members through events, educational programming & communications

75 Volunteers • 19 Interns • 10,500+ Service Hours

*"This staff is truly unique and I love being surrounded by powerful and determined individuals who all share a common goal of saving our native wildlife".*

-Kaisha Chaves Solomon, Intern & Volunteer

### New Species

- Carolina Wren
- Lesser Nighthawk
- Leach's Storm-petrel

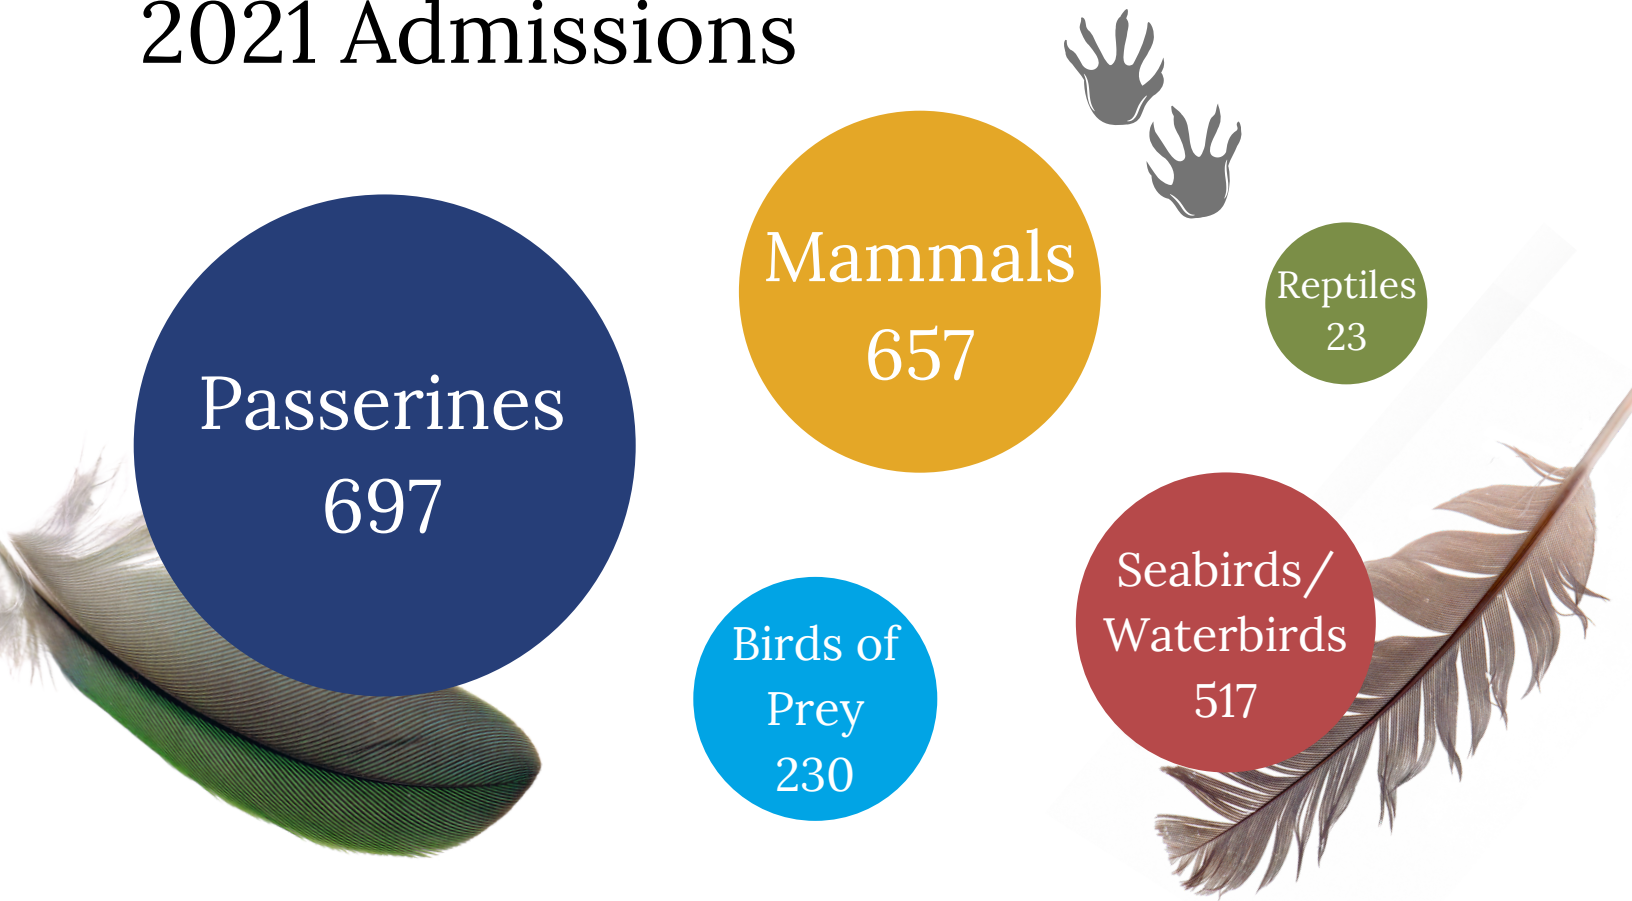

### Threatened Species

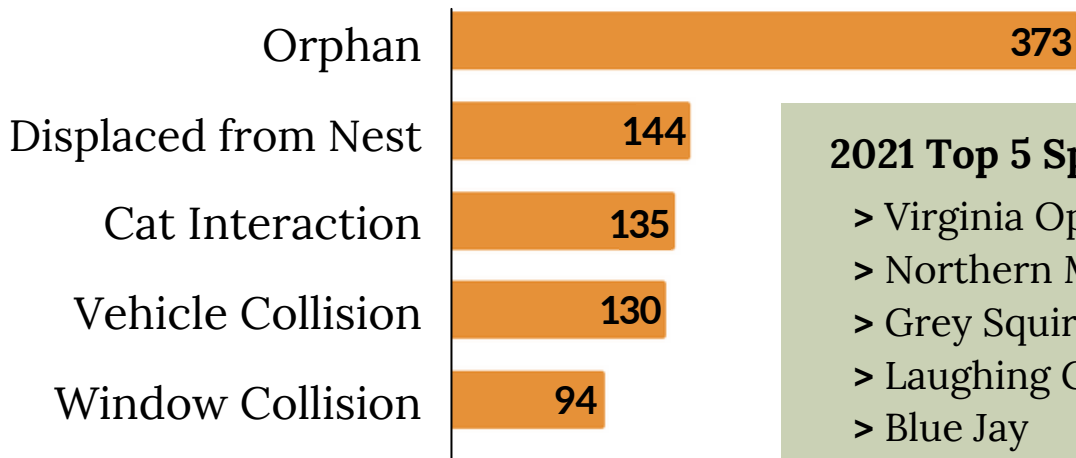

- American Kestrel
- Black Skimmer
- Burrowing Owl
- Gopher Tortoise
- Least Tern
- Little Blue Heron
- Tricolored Heron
- Wood Stork

# 2021 Admissions

## Top Reasons for Admission

### 2021 Top 5 Species Treated

- > Virginia Opossum
- > Northern Mockingbird
- > Grey Squirrel
- > Laughing Gull
- > Blue Jay

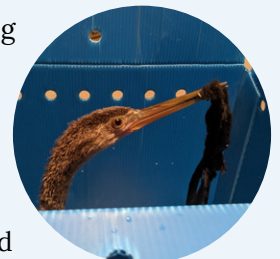

### Fallen Bald Eaglets Rescued

April 19th, 2021- After a heavy thunderstorm damaged a local Eagle nest, two eaglets fell over 100 feet to the ground. The first eaglet was quickly rescued, followed by its sibling after an exhaustive two-week search. Both birds were later transferred for continued care.

### Anhinga Saved from Facemask

August 18th, 2021- An adult Anhinga was rescued from a lake in Doral after being found with a cloth face mask tangled in its beak. Luckily, our clinic staff were able to carefully remove the mask and the bird was released six days later!

# How You Can Support PHSS

## Ways to Donate

- Make a one-time or monthly recurring gift
- Donate appreciated assets
- Adopt an Ambassador Animal
- Give with cryptocurrency
- Create a Facebook fundraiser
- Shop our PHSS merchandise
- Join our Legacy Society
- Support our Capital Campaign
- Select PHSS and shop our wishlist on [smile.amazon.com](https://www.smile.amazon.com)

## Volunteer

- On-site
- Operation Rescue & Release
- Animal care internships

## Spread the Word

- Follow us on social media
- Sign up for our emails and quarterly newsletters

## Get Involved

- Attend a Sunset Cruise, Behind-the-Scenes Tour, monthly webinar, & more!

\*PHSS received the Payroll Protection Program and Employee Retention Tax Credits in 2021. As a result, unrestricted income for the overage was transferred to support the Capital Campaign.

The release of this document precedes our Financial Review and 990 submission to the IRS. These documents may be found by scanning the QR code on the left. Additionally, these financials do not include gifts made toward the capital campaign.

## The Legacy Society

The legacy society recognizes those individuals and families who have remembered Pelican Harbor Seabird Station in their estate plans through a documented planned gift. More so, it serves to enable members and friends to witness the value of PHSS in their lives and secure Florida's native wildlife for generations to come.

### Membership is simple—no need to donate today!

Simply name PHSS as a beneficiary in your will, trust, insurance policy, donor-advised fund, or foundation.

### Thank you to our Legacy Society members:

We are proud to announce that we recently passed the halfway point of our Capital Campaign fundraising goal, bringing us one step closer to breaking ground within the next 12 months. Previously owned by Miami history icon Julia Tuttle, this new 2.6-acre property is truly an urban oasis. This expansion will increase our property size by 14x, providing plenty of room for flight cages and appropriately sized habitats for our various patients and educational Ambassador Animals. Furthermore, our new wildlife hospital and nature center will be 7x larger than our current facility, allowing us to provide state-of-the-art individualized care for every one of our patients. Scan the QR code to the right to learn more and donate today!
